REPORT

JULY - JANUARY

Dear friends!

Already a year ago, in February 2024, when our people continued the heroic struggle against the Russian aggressor, I founded the SemarglS charitable foundation in Chernihiv.

Our mission is to support children, the future of our country, in these difficult times of war. The main project of the fund was a scholarship program for talented children of Chernihiv from families in need of support. She not only provides financial assistance, but also lights the fire of hope in the hearts of children, proving that success is not the privilege of the chosen ones, but the result of hard work.

Despite all the trials, we have no right to forget about tomorrow. Right now, when Ukraine is fighting for its freedom and identity, it is critically important to invest in our future - our children. History proves: nations that, even in the most difficult times, took care of the development of human capital, always became stronger.

By creating conditions for revealing the potential of every child, we are laying the foundation for a strong and prosperous Ukraine. The SemarglS Charitable Foundation is our contribution to the future. Every child we help today is a bright tomorrow for our country.

Together we create the future we are fighting for!

Sincerely,
Maryna Semenenko

SCHOLARSHIP PROGRAM

Knowledge is a signpost to a bright future. That is why the SemargIS charitable foundation launched the "Protect the Future" scholarship program for talented students of Chernihiv. This initiative is not just material support, but a real symbol of faith in children and their capabilities.

The program is open to students in grades 5-11 who have high academic achievements and belong to socially vulnerable categories. We help those who, despite life's challenges, seek knowledge and development. A scholarship of 2,000 hryvnias is not only a recognition of their perseverance, but also a contribution to their future.

We are happy to announce that the scholarship program is successfully underway!

The second award ceremony has already taken place, and according to the results of the first semester of the 2024/2025 academic year, 41 schoolchildren from Chernihiv received scholarships

This is not only financial support, but also a powerful incentive for their further development. Every scholarship awarded is a story of hope, an opportunity for a child to believe in their abilities and confidently move towards their dreams.

We are sincerely glad that we can make a real contribution to the lives of children and their families. Each scholarship is not just financial support, but above all, faith in the child's talent and capabilities, in his ability to change the world for the better. Looking to the future, we are full of hope and confidence that every year the circle of scholarship holders will expand, and with it the number of happy children's smiles, fulfilled dreams and new opportunities will grow.

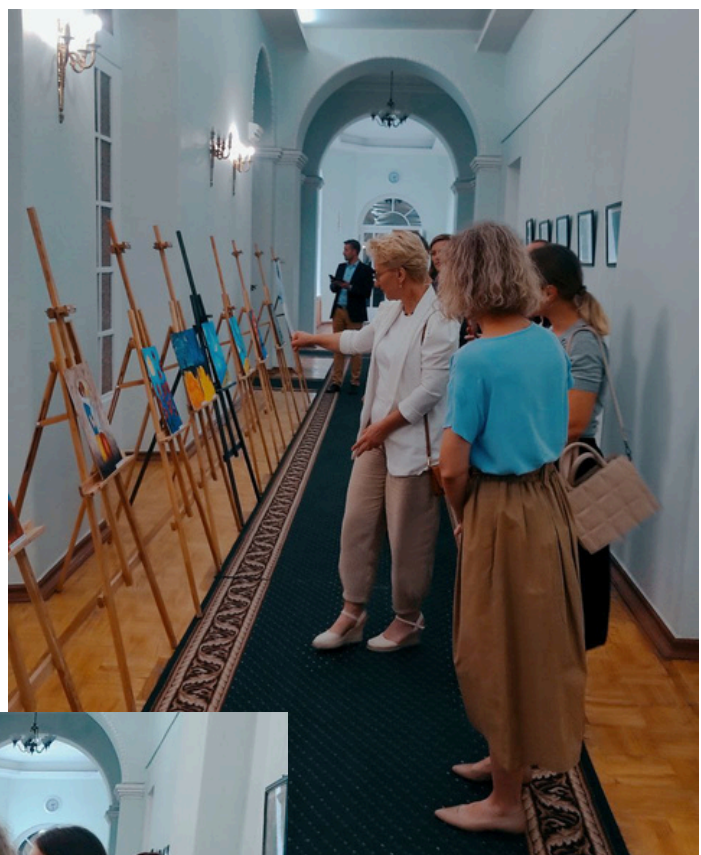

**Exhibitions of children's
creativity: results of the
project "Colors of friendship:
Ukraine - Latvia"**

The project "Colors of Friendship: Ukraine - Latvia" united talented children from Chernihiv Oblast and became an important initiative that promotes emotional recovery and cultural exchange between our countries.

The first exhibition of children's works was held on August 10 in the shopping center "Hollywood". It became a real celebration of creativity, where each picture reflected a unique vision of the world, emotions and dreams of our young artists. This event highlighted the deep talent and creativity of Ukrainian youth, as well as strengthened cultural ties between Ukraine and Latvia.

The next stage of the project was an exhibition in a new location – the Chernihiv Regional State Administration, where the works of young artists were presented to a delegation from Latvia headed by Dace Melbarde, Parliamentary Secretary of the Ministry of Foreign Affairs of Latvia. This event emphasized the importance of creative initiatives in supporting children and developing international partnerships.

The exhibition in the Diet of Latvia was especially significant, where the paintings created by children as part of art therapy master classes had the opportunity to be seen outside of Ukraine.

The "Colors of Friendship" project was made possible thanks to the support of Olena Vyshniakova, Honorary Consul of the Republic of Latvia in Chernihiv and Chernihiv region. Its main goal is to help children regain their emotional balance through creativity, as well as to strengthen the sense of unity between Ukraine and Latvia.

Mental arithmetic

Since September 2024, the charitable foundation has started regular classes on mental arithmetic for children. This educational initiative is aimed at the development of cognitive abilities, including concentration of attention, speed of thinking, improvement of memory and logical thinking. Classes take place every week in the format of group lessons. The participants were children aged 7 to 12 from socially disadvantaged sections of the population.

Each lesson takes place in a relaxed atmosphere, which promotes better learning of the material and supports the emotional comfort of children. Teachers use modern teaching methods and interactive exercises to make the learning process interesting and exciting.

The main results for the period of September - January:

- More than 30 children are involved, who actively participate in classes and demonstrate significant success.
- Improved verbal arithmetic skills - participants began to perform complex mathematical operations faster and more accurately without using a calculator or paper.
- Self-confidence is strengthened - children become more persistent and motivated to study.
- Development of concentration and attention - classes help children to focus better on academic tasks at school and in everyday life.

Chess lessons

Since September 2024, the charitable foundation has started chess classes for children from socially disadvantaged sections of the population. This project aims to develop children's strategic thinking, patience, analytical skills and the ability to make informed decisions. Chess also promotes increased concentration and emotional stability.

Main results (September - January)

- Mastering the basic skills of playing chess - children learned the basics of chess strategy, developed the ability to predict the opponent's moves and make strategic decisions.
- Increasing the level of independence and critical thinking - participants became more confident in analyzing situations and finding the best solutions.
- Improvement of social skills - the classes contributed to the development of team spirit, taught children to constructively interact with their peers, respect the opponent and accept both victory and defeat with dignity.

**Results of a series of
brain-rings**

In November 2024, the "SemarglS" charitable foundation, together with our partner Multiplex, started a series of intellectual competitions "Brain-ring" for 6th graders. This initiative became an important event for local schools and gathered around it young, inquisitive and creative participants.
